Skills and technologies

Technology

Python - Jr. for Pentesting

I have junior-level proficiency in Python for pentesting. I can use Python to develop scripts and tools for penetration testing purposes, such as network scanning, vulnerability assessment, and exploit development.

Git / Github - intermediate

I have an intermediate level working with this technology. Git is a widely used version control system for software development, while GitHub is a Git repository hosting platform. I know the basics of Git and can perform operations such as cloning repositories, creating branches, merging changes,

Courses

ICE Certification of Cambridge University

Certificado UTN en Technologia MS Powerpoint Nivel Avanzado

Analista junior en ciberseguridad CISCO Networking academy

python ofensivo Udemy

and collaborating on projects using GitHub.

CISCO Packet tracer - intermediate

I have intermediate knowledge in this network analysis and modeling technology. This system allows the use of simulations, testing and security control in computer networks, among other things.

Nmap - intermediate

I have intermeadiate knowledge of Zenmap. Zenmap is a graphical user interface (GUI) for the Nmap network scanning tool. It allows me to easily scan networks and discover open ports, services, and vulnerabilities in networked devices.

Postman -intermediate

I have intermediate proficiency in using Postman. Postman is a popular collaboration platform for API development that allows you to make requests, test, and document APIs. I can use Postman to send HTTP requests, analyze responses, and perform API testing and debugging.

Education

Modern High School

2007 - 2022

Finished secondary school
(Bilingual Bachelor in Natural
Science)

Universidad Tecnologica Nacional

2023 - Now

Coursing University (information
systems engineering)
